

Note to Professional Organizers

First, a note of gratitude to professional organizing colleagues who saw value in my Clutter Flow Charts from the beginning, and who ordered custom-branded charts for their businesses. I would have lost interest long ago and this workbook would not have happened without your encouragement and support!

Although I will no longer be custom-branding the charts, or selling them individually, I do want to let you know how I encourage you use this workbook to help your clients and grow your businesses.

How to use this workbook

You may:

- Use this workbook while decluttering with clients, particularly those who would benefit from a visual aid to improve focus and reinforce key concepts. It's a handy teaching tool for both new and experienced organizers; helpful for working with virtual organizing clients; and beneficial to those with ADHD and other brain-based conditions.
- Copy individual charts (but not entire chapters) to hand out to clients, as appropriate to their situation, on the condition that you also credit me as the author and provide the [GoFlowCharts.com](https://www.GoFlowCharts.com) link to your clients for workbook purchasing info.

- Base a presentation on one or more of the chapters on the condition that you also credit me as the author and provide the GoFlowCharts.com link to your students for workbook purchasing info.
- Post an image of a single Clutter Flow Chart — one specific to your audience, or the Original (download available at GoFlowCharts.com) — on your website/newsletter/social media on the condition that you also credit me as the author and provide the GoFlowCharts.com link to your readers for workbook purchasing info.
- Recommend the workbook or give them as gifts to clients, colleagues, friends, and relatives!

You may not:

- Alter the charts or workbook contents in any way.
- Share the workbook contents beyond what is specified above without additional permission.
- Sell the charts or workbook contents.

NOTE: For the best quality chart images, let me know how you intend to use them. If you have purchased this portrait-oriented paperback edition of the workbook, I can give you complimentary access to the landscape-oriented PDF edition as well.

I'd love to answer your questions, hear your creative ideas, and share your successes with you!
